Spotlight

This section is dedicated to the introduction of our A.C. DePuydt family members.

Estelita DeGuzman
Account Representative

If you have ever had a past due balance, you've probably heard from her. Estelita DeGuzman is our account representative, handling all accounts receivable and accounts payable issues.

Estelita joined our team in September of '94, as our accounts receivable rep, and since has become an integral part of our company. Besides assisting customers with past due balances, Estelita (continued on p2)

New Web Site On-Line!

Check out all the changes @ www.acdepuoydt.com

Finally!

After a lot of planning and a lot of work, its finally up. Our new web site, acdepuoydt.com is officially live, and ready to help assist our customers with making choices for their hydraulic and pneumatic sealing needs.

At acdepuoydt.com, you will find these easy-to-navigate sections:

Seals & Packing: Split into two parts, standard (inch) and metric (mm), this section contains information, such as seal application, materials availability, and (continued on p2)

The ACD Distributor Kit

By Darren Held

Looking to open a cylinder repair shop, or maybe a seal house? Maybe you're tired of not having any seals in stock, and having to go through the hassle of ordering even the most standard part, day-in and day-out?

If this is your problem, then we've got the solution! The ACD Distributor kit is the most complete seal kit we offer for seal distributors and repair shops that want to have it all! Our kit is made up of 8 different sections, and is available as a complete

package, or in individual sections.

ACD-DIST/OR: A huge assortment of Buna/70 Duro standard O-rings; -006 to -050, -110 to -163, -206 to -266, -318 to -365, and -425 to -453.

ACD-DIST/BUR: The companion to the ACD-DIST/OR, this kit contains Buna/90 Duro standard Back-up rings.

ACD-DIST/POLYS: Hundreds of loaded U-seals, standard and B-lip design. Sizes include 1/8 to 1/2in cross section, 1 to 6in ID, and a variety of heights.

ACD-DIST/WR: A large selection of Nylon wear rings, ranging from 2 to 6in OD, in various heights. This kit also includes 3/8, 1/2, 5/8, 3/4 and 1in wear strip.

ACD-DIST/WIPERS: A variety of D, X and Canned wipers.

ACD-DIST/PS: A large selection of PS14, PS16, PS18, and TP piston seals.

ACD-DIST/VEES: All the vees and adapters you need to make v-packing sets with 1/4, 5/16, 3/8 and 1/2in cross sections.

ACD-DIST/PC: A variety of homogenous Buna and Fabric piston cups, with OD's ranging from 1 to 6in.

To see additional information on the ACD-Distributor kit, including component make ups for each section, check out the seal kit section of our web site at www.acdepuoydt.com.

New Vendor: Redmond Plastics

By Darren Held
Redmond Plastics, a division of JM Clipper, has been manufacturing custom precision products from high performance materials since 1957.

Their products can be found in a wide array of applications, including heavy machinery, pulp and paper, food processing, chemical, hydraulic, medical, electronic, aerospace, and automotive. Redmond relies on cellular manufacturing to turn around custom precision products, up to 38in diameter, in a matter of days, not weeks. The standard PTFE material Redmond uses, functions in applications from -450 to

pylene, and Nylon, just to name a few.

In addition to the custom products, Redmond also makes Radyne rotary shaft seals and Radyne spring energized seals.

Radyne rotary shaft seals come in five different styles and are available in cross sections ranging from .200 to .750in and for shafts measuring .125 to 4.000in.

The rotary shaft seals are available for application with shaft speeds up to 6000 fpm and temperatures ranging from -40 to +500 degrees Fahrenheit. These seals are for rotary motion only.

Radyne spring energized seals are available in four

+550 degrees Fahrenheit. PTFE is chemically inert and will not combust, corrode or age. It is also self-lubricating, and creates minimal slip-stick. Its friction coefficient is the lowest of any material, and it reduces as load increases.

Redmond also provides the following materials; Torlon, Vespal, PEEK, Hytrel, Ryton, Delrin, Polypro-

styles and in four cross sections; 3/32, 1/8, 3/16, and 1/4in. These seals are available in .125 to 16.000in shaft range.

The spring energized seals work in applications with rotary motion up to 300 fpm, reciprocating motion, and in static applications. Working temperature range is from cryogenic to +600 degrees Fahrenheit.

(continued from p1)

also issues all return goods authorizations for returns, corresponds with our vendors, cuts payable checks, and preforms other accounting related functions. Estelita's most valuable asset is the ease at which she builds positive, long term rapport with customers. This asset often comes in handy when customers find they are having "financial problems".

When Estelita's not at A.C. DePuydt, she's at her other full time job in Downey, wife and mother of two.

Even a busy, working mother tries to find time to pursue her hobbies. Estelita enjoys fresh and dry flower arranging, and an occasional dinner-dance with her husband.
